Sample OET Reading Passage for Nurses 20

Below is an example of a typical OET reading passage for nurses. This sample reflects the kind of content and questions you may encounter in the exam.

Sample Passage:

Title: Managing Postoperative Wound Care in Surgical Patients

Effective postoperative wound care is vital to prevent infection, promote healing, and ensure optimal recovery for surgical patients. Nurses play a key role in monitoring wound status, providing patient education, and implementing appropriate dressings and hygiene protocols.

Recent studies indicate that maintaining a clean and moist wound environment accelerates healing and reduces complications. The choice of dressing depends on the wound type, exudate level, and patient factors. Common dressings include hydrocolloids, alginates, and foam dressings, each with specific indications and benefits.

Monitoring signs of infection—such as redness, swelling, increased pain, and purulent discharge—is essential. In cases where infection is suspected, prompt assessment and communication with the medical team are necessary. Additionally, educating patients about wound care practices at home

reduces the risk of postoperative infections.

Sample Questions:
