The administration of justice in ancient India reflects a sophisticated and deeply rooted tradition that has significantly influenced the development of legal systems in the Indian subcontinent. From the earliest Vedic texts to the classical period of Indian history, the approach to justice was characterized by a blend of spiritual values, social norms, and pragmatic governance. This article aims to explore the multifaceted nature of justice administration in ancient India, shedding light on its institutions, principles, procedures, and evolution over time.

Introduction to Ancient Indian Justice Systems

Ancient India's approach to justice was inherently intertwined with its religious and philosophical doctrines. The concept of Dharma—moral and ethical duty—formed the cornerstone of justice, guiding rulers, judges, and citizens alike. The legal framework was not merely a set of codified laws but a comprehensive system that emphasized righteousness, social harmony, and moral

responsibility. The earliest references to justice are found in the Vedic texts, where societal order was maintained through divine sanctions and customary laws. Over centuries, these principles evolved into more formalized institutions, culminating in texts like Manusmriti, Dharmashastra, and later, the Arthashastra of Kautilya.

Procedures and Principles of Justice
