Fundamental Concepts of Research in Psychology

Before diving into specific methods, it's essential to understand the foundational ideas that underpin psychological research.

Formulating Research Questions

Research begins with identifying a question that addresses a gap in existing knowledge. Morling emphasizes the importance of specificity and clarity in framing these questions, which guide subsequent methodology.

Operational Definitions

Operational definitions specify how variables are measured or manipulated, ensuring clarity and replicability. For example, defining "stress" through physiological markers like cortisol levels.

Hypotheses and Predictions

A hypothesis is a testable statement about the expected relationship between variables. Morling discusses how to develop hypotheses based on theory, prior research, or observations.

Types of Research Methods in Psychology

Psychological research employs diverse methods to explore different questions. Morling's book categorizes these approaches into several main types.

Descriptive Methods

Descriptive research aims to characterize behaviors or phenomena without manipulating variables.

1. **Observational Studies:** Watching and recording behaviors in natural or controlled settings.
2. **Case Studies:** In-depth analysis of a single individual or group.
3. **Surveys and Questionnaires:** Gathering self-reported data on attitudes, beliefs, or behaviors.

Correlational Research

Correlational studies examine relationships between variables without establishing causality.

1. Using statistical measures like Pearson's r to assess the strength and direction of relationships.
2. Understanding the difference between correlation and causation to avoid misinterpretation.

Experimental Methods

Experiments are designed to test causal hypotheses by manipulating variables and controlling extraneous factors.

1. **Independent and Dependent Variables:** The researcher manipulates the independent variable and observes effects on the dependent variable.
2. **Random Assignment:** Participants are randomly assigned to conditions to control for confounding variables.
3. **Control Groups and Placebos:** Used to compare effects and account for placebo effects.

Designing Psychological Research: Step-by-Step

Morling emphasizes a systematic approach to designing research studies, ensuring validity and reliability.

Developing a Research Plan

1. Identify your research question and hypothesis
2. Choose the appropriate method (descriptive, correlational, experimental)
